

Notification Letter

Date: February 24, 2021

Site: River Road, Township of Chisholm

Subject: New 36.6-Meter Tower Installation for Fixed Wireless Internet Service

As part of a project initiative by Blue Sky Net, Spectrum Telecom Group proposes to construct a 36.6 meter (120-foot) high, self-support tower mast on municipal land located near civic address 1147 River Road in the Township of Chisholm. The proposed wireless site will be a key component in a network designed to extend high-speed Internet and related services to the public and business users in the area. You are receiving this notification because you own property within the specified notification area of the proposed site.

The Township of Chisholm requires that the following information be sent to residents in the area as part of its notification process. This process allows residents an opportunity to provide comments and feedback so the Municipality can properly assess impact and determine whether the project is in the best interests of the community as a whole.

1. **Purpose of the Structure:** The proposed tower mast will support antennas and wireless equipment designed to provide fixed high-speed Internet access and related services to residents and business users located in the underserved northeastern portion of the Township.
2. **Location:** The proposed mast will be constructed on an unopened section of municipal road allowance located about 270 meters west of the River Road/Golf Course Road Intersection. This section of unopened road allowance is located between Lot 20, Con.16 and Lot 20, Con. 17, The property identifier is PIN 49189-0484. The location is shown on Attachment 1. The approximate geographical coordinates of the site are: *Latitude 46.16465 degrees; Longitude -79.21366 degrees.*
3. **RF Exposure Levels:** RF output power of the networking and backhaul radio equipment proposed is relatively low. Consequently, the tower and its antennas will not expose the public to any harmful levels of radio frequency (RF) exposure whatsoever and will be installed and operated on an ongoing basis so as to comply with Health Canada's Safety Code 6. This code establishes safety guidelines for the protection of the public against the effects of radio frequency fields.

The level of RF exposure experienced by an individual standing on the ground near the base of the tower is calculated to be less than one percent of the maximum limit as specified in Safety Code 6 and drops exponentially with distance.

4. **Public Access Control:** Electronic equipment will be mounted at an elevated level on the antenna mast as well as inside a secured shelter which is not accessible to the general public. The site compound will be enclosed within a locked chain link fence to help prevent unauthorized climbing of the structure.
5. **Site Environmental Status:** The proposed antenna mast and equipment shelter installation, having minimal environmental impact, does not require an environmental assessment as the facility meets the exclusion criteria as specified in the Canadian Environmental Assessment Act.

6. **Support Mast and Antenna System:** A profile of the tower is included as Attachment 2. Internet services will be extended to customer locations over specialized distribution antennas. A picture of a typical distribution antenna (which would be attached near the top of the mast) is shown on Attachment 3, figure 1.

The tower will also support one 1.2-meter (48") maximum diameter dish-type antenna (similar to that shown on Attachment 3, figure 2). This antenna will provide backhaul connectivity to the Internet and Spectrum Telecom's wide-area telecommunications network

Images of the actual tree line near the site, with a simulated image of the tower superimposed, is also shown on Attachment 4 (photos 1 and 2). These images will provide a good idea of what the tower would look like on the landscape.

7. **Aviation Obstruction Marking:** Spectrum Telecom Group proposes not to equip the tower with white, red, or flashing aviation obstruction lighting as the structure likely does not pose a significant threat to aircraft navigation in the area. However, Spectrum Telecom Group will conform to any aeronautical safety requirements that may be mandated by Transport Canada or NAV Canada. Typically, lighting or paint marking scheme is not required on smaller towers such as the one proposed unless it's located close to an aerodrome.
8. **Installation Practices and Structural Adequacy:** The tower proposed is commonly used throughout the region for various telecommunications applications and is designed to support the intended antenna load with a significant safety margin. The tower and associated antennas will be installed in accordance with CSA Standard S37, manufacturer's specifications, and established installation practices.
9. **Land Use Requirements:** The site chosen has been coordinated with the Township of Chisholm and concurrence from the Municipality is required before construction can begin. Spectrum Telecom Group will comply with any applicable local land-use requirements that we are made aware of.
10. **Contact Information:** This notice initiates an invitation to the public to provide written comments to Spectrum Telecom Group about this proposal by **April 9th, 2021**. Please mail, e-mail (preferred), or fax your comments to the following address:

Spectrum Group
132 Imperial Road,
North Bay, Ontario, P1A 4M5
Attn: Mr. Wayne Lynch

E-mail: consultation@spectrumtelecom.ca
Fax: (705) 474-6192
Phone: (705) 474-6368, ext. 414
Toll Free: 1-800-267-8560

The Land Use Authority (LUA) for the area is the Corporation of the Township of Chisholm. Contact information for the LUA is as follows.

Township of Chisholm
Attention: CAO Clerk-Treasurer
2847 Chiswick Line, RR # 4
Powassan, ON P0H 1Z0

Phone: (705) 725-3526, ext. 203
Fax: (705) 724-5099
Email: j.leblond@chisholm.ca

11. **Acknowledgement of Concerns:** Any written comments from the public will be promptly acknowledged and responded to within two to three business days. Any comments received will be forwarded to the Municipality along with the corresponding response.
12. **Public Meeting:** A public meeting is scheduled by the Municipality for **April 13th, 2021 at 7:00 PM**. This meeting will be an opportunity to learn more about the project and also to voice any comments or concerns you might have. Due to COVID-19 safety measures currently in place, attendance by the public is restricted to teleconference access only. If you wish to participate, the access numbers are as follows.

Dial-in Number: 1-855-343-6177
Conference ID: 5125690#

Kindly review this proposal and, if you wish to forward any comments, please do so within the time period outlined above.

Thank you.

Wayne Lynch
Project Administrator
Spectrum Telecom Group

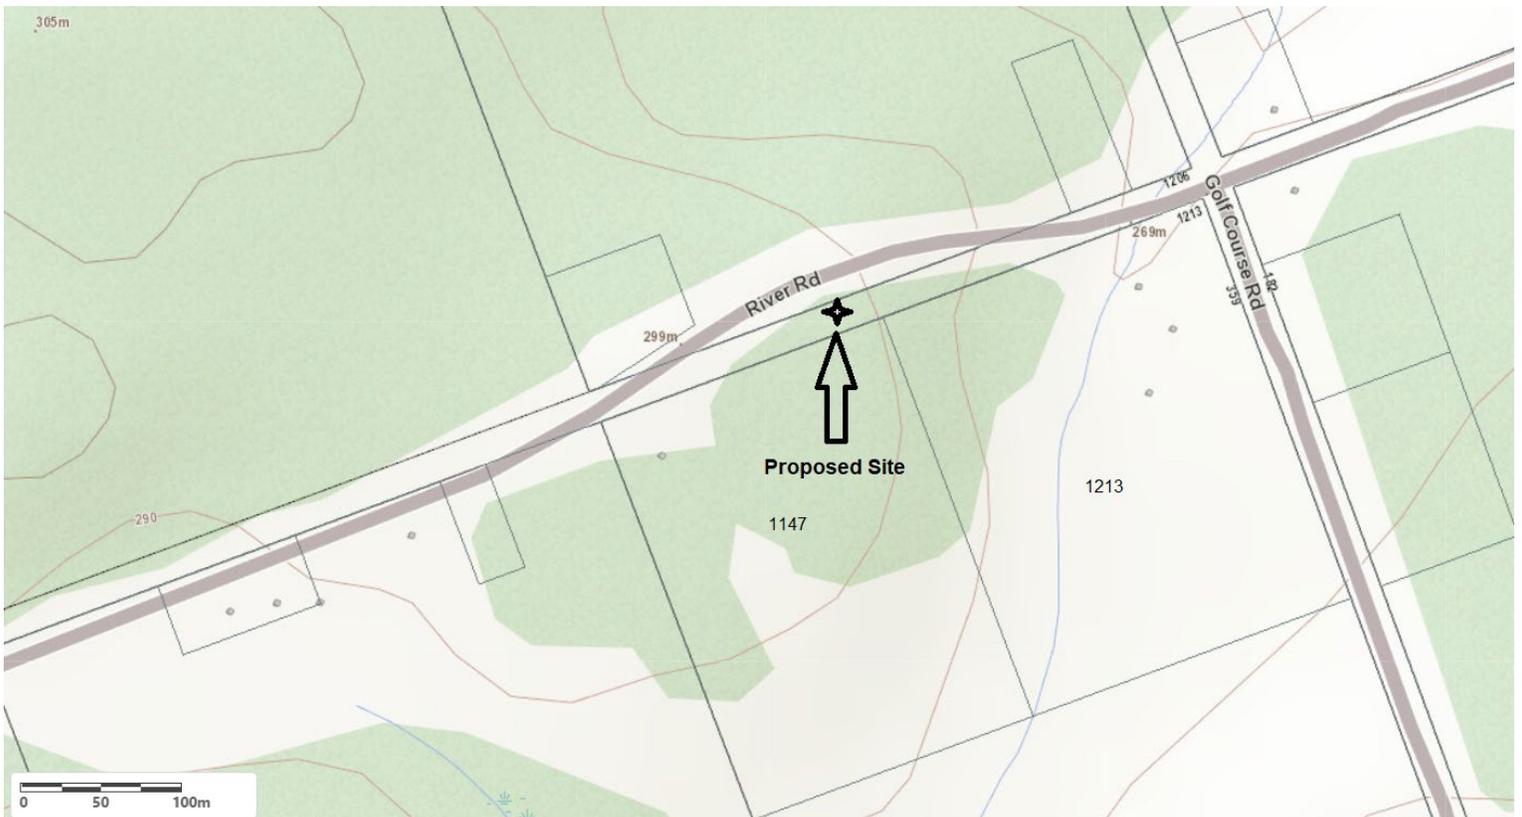

Blue Sky Net

Blue Sky Net helps municipalities in Northeastern Ontario to develop information technology applications as well as assist with the rollout of enhanced telecommunications infrastructure. This is facilitated by bringing together service providers, potential users, and government programs with a view to creating a viable business case and overcoming the many challenges associated with developing broadband infrastructure in rural communities. More information can be found on the Blue Sky Net website: <https://blueskynet.ca>

Spectrum Telecom Group

Spectrum Telecom Group Ltd. is a wireless, two-way radio, ISP, and broadband solutions company that provides integrated telecommunications solutions and networks for residential, business, and government clients throughout the Province of Ontario. More information can be found on the Spectrum Group website: <https://spectrumtelecom.ca/company/about-us/>

Proposed River Road Tower Site Location

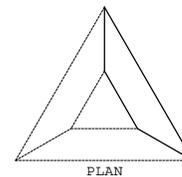

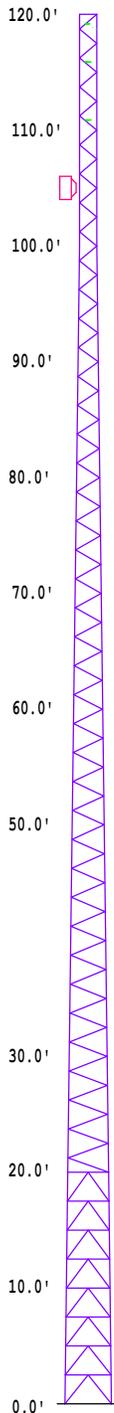

Property Description: Unopened Road Allowance between Lot 20, Con.16 and Lot 20, Con. 17, PIN 49189-0484

Site coordinates: Lat 46.16470 °; Long. -79.21366 °

Elevation: 968 feet (295 meters) AMSL (approximate)

Tower Height: 120 feet (36.6 meters) AGL
