Source Protection Plan: Policy Updates

January 26, 2026

To: Township of Chisholm

From: Jason Trottier, Chair,
North Bay-Mattawa Source Protection Committee

Re: Notice of Source Protection Plan Revisions

Dear Mayor, Council, Clerk & Staff of the Township of Chisholm:

The North Bay-Mattawa Source Protection Committee has been undertaking a detailed review of the Source Protection Plan and Assessment Report for the North Bay-Mattawa Source Protection Area. This letter serves as a notice that draft proposed Source Protection Plan updates are now being circulated to the Township of Chisholm for your review and comment. Comments may be submitted to the Source Protection Committee by email at dwsp@nbmca.ca or to the Conservation Authority mailing address below by end of day on March 1, 2026.

Copies of the draft proposed versions of the Source Protection Plan and Assessment Report are available for download at:
<https://nbmca.ca/watershed-management/drinking-water-source-protection/>

The most substantial changes in this revised edition are the intake protection zone mapping has been updated to reflect updated watercourse and wetland mapping data and the policies are now reflective of the 2021 version of the Technical Rules and Tables of Drinking Water Threats. The revised boundary for the Callander IPZ-ICA may result in additional residents being included in the On-site Sewage System Mandatory Maintenance Inspection program.

This notice includes a table highlighting the policies that have been added, revised, or removed as relevant to the Township of Chisholm in the Callander Issue Contributing Area (IPZ-ICA) and the broader Highly Vulnerable Aquifer (HVA).

The North Bay-Mattawa Conservation Authority will be hosting meetings for municipal staff and Source Protection Authority board members for a detailed review of the changes. All property owners within the Callander IPZ-ICA are receiving notices of public consultation.

Staff and SPA members from the Township of Chisholm are welcome to attend any of the following meetings:

- February 4, 1:30 p.m. to 3:30 p.m. at the Callander Community Centre, 1984 Swale Street, Callander
- February 19, 10 a.m. to 12 p.m. Virtual Teams Meeting:
<https://teams.microsoft.com/meet/27687510099697?p=YNSeerPJwj1wM42WTv> Meeting ID: 276 875 100 996 97 Passcode: ta9kv2ay

The North Bay-Mattawa Source Protection Committee specifically requests your feedback on the proposed mapping, new policies, and other updates to the Source Protection Plan.

Notice of Public Consultation On Proposed Source Protection Plan and Assessment Report Updates

Deadline for comments: March 1, 2026 at 11:59 p.m.

On behalf of the North Bay-Mattawa Source Protection Committee and Authority, please be advised of the proposed updates to the Source Protection Plan and Assessment Report for the North Bay-Mattawa Source Protection Area. This Notice is being posted for public consultation and circulated to municipalities, ministries and other implementing bodies as required under the *Clean Water Act, 2006*. The proposed updates are prepared as per section 36 of the *Clean Water Act, 2006* and the 2021 Technical Rules. Comments may be submitted to the North Bay-Mattawa Source Protection Committee by email at dwsp@nbmca.ca.

The Source Protection Plan contains policies that help protect municipal source of drinking water. The Assessment Report contains the technical studies that support the policies. The proposed Source Protection Plan and Assessment Report and maps are available at:

<https://actforcleanwater.ca/public-consultations-reports/source-protection-plan/>

The most substantial changes in this revised edition are the intake protection zone mapping has been updated to reflect updated watercourse and wetland mapping data and the policies are now reflective of the 2021 version of the Technical Rules and Tables of Drinking Water Threats. The revised boundary for the Callander IPZ-ICA may result in additional residents being included in the On-site Sewage System Mandatory Maintenance Inspection program.

Summary of key updates to the Assessment Report:

- Updated watershed monitoring data under watershed characterization.
- Applied the 2021 Technical Rules and Tables of Drinking Water Quality Threats to technical work including:
 - update of impervious surface area maps (which in turn help identify and assess threat activities such as the application of road salt)
 - use of revised terminology Intake Protection Zone (IPZ)-Issue Contributing Area (ICA) for the Callander municipal drinking water source
 - update to background details for threat activities
 - update to numbers of existing threat activity counts and circumstances.
- Updated the Callander IPZ-1, IPZ-2, and IPZ-ICA and North Bay IPZ-2 map to reflect Technical Rule guidance and updated wetlands and watercourse delineation data.

Summary of key updates to the Source Protection Plan:

- Applied the 2021 Technical Rules and Tables of Drinking Water Quality Threats including an updated list of prescribed threats, applicable threat subcategories, and vulnerable areas.
- New and revised policies capture changes to the Technical Rules and are outlined in the table below.
